

Quality Management Statement

Introduction

1.1 General

This Quality Management Statement sets out a framework for the development and implementation of a Quality Management System to meet the requirements of Time to Market.

This Policy Statement is applicable to all activities undertaken by Time to Market, its business divisions, operating companies, business units and any companies owned or controlled by Time to Market Ltd.

The Policy Statement is issued by the Managing Director, Time to Market Ltd.

1.2 Definitions

Standard definitions used in quality management systems are set out in ISO 9000:2000 "Quality Management Systems – Fundamentals and Vocabulary".

2 Objectives and Commitment

The overall quality objective is to ensure that Time to Market delivers a consistently high level of service throughout our business. Time to Market is committed to implementing appropriate quality management systems to enable the delivery of the highest practicable quality services. We will therefore:

- Clearly understand the current and potential future requirements and expectations of our customers.
- Work closely with our customers, suppliers and partners to achieve business and quality objectives.
- Provide services of the highest practicable quality, reliability and consistency that meet our customers' requirements.
- Implement quality management in a systematic and planned way through the application of management systems that support the business plan.
- Educate and train our people to support high quality work.
- Establish and measure performance and customer satisfaction against appropriate quality objectives and/ or targets.
- Measure at an appropriate level service performance and customer satisfaction.
- Review and improve our processes and levels of service.

We all share the responsibility for the supply of high quality services and their continual improvement. Long term relationships require on-going commitment to achieving business excellence.

3 Principles

As a company, we pride ourselves on supplying services that are of a high quality. The implementation of a quality management system enables the company to:

- Analyse customer requirements.
- Define processes that will contribute to the achievement of a service that is acceptable to the customer.
- Keep those processes under control.

A quality management system provides the framework for continual improvement and thus increases the probability of enhancing customer satisfaction and the satisfaction of other interested parties.

It effectively provides the company and its customers with the confidence that the provision of services will be to consistent predetermined high standards.

Quality management systems can assist organisations in enhancing customer satisfaction and contribute directly to company growth.

4 Requirements

4.1 Quality Management System

Managers will, as an integral part of the management of their business, develop and implement appropriate quality management systems that address the following elements:

- *Quality Management* – ensuring a formalised, explicit and pro-active approach to systematic business management; meeting its many responsibilities and operating in respect of all business services supplied by Time to Market. It will include, as its foundation, a statement of quality policy defining the business unit's fundamental approach to managing quality. It will be based upon common principles which will enable the company to identify its strengths and weaknesses; provide for evaluation against generic models; external recognition and provide a basis for continual improvement.
- *Quality Responsibility* – ensures that everyone involved in the quality aspects of the business has clearly defined responsibilities and that managers are responsible for the quality performance of their own organisations
- *Quality Priority* – ensures that it is recognised that quality issues do not take precedence over health, safety or environmental issues, rather that the quality management system actively supports those management elements.
- *Quality Objective* – ensuring that while supporting the business service, the principal quality objective is to set the standards that will deliver a consistently high quality of work throughout the business activities thus ensuring customer satisfaction and continual improvement in the level of service provision.

4.2 Quality Achievement

Within the operation of the Quality Management Systems, the business will ensure:

- *Competency* – Staff are adequately trained, motivated and competent for the job they are required to do.
- *Quality Management Responsibility* – A quality manager/ representative is identified with organisational responsibility for the development and maintenance of the quality management system and is responsible for reporting to the highest organisational level of the business.
- *External Services* – The selection and approval of externally provided services will be controlled by the quality management system procedures, thus ensuring that the company's health, safety and environmental culture is not compromised and staff, customers and third parties are not put at risk. Provision of these external services will be subject to regular review.
- *Quality Failings* – all failings of the Quality Management System which have/or could have resulted in non-compliance with the associated standard will be investigated and corrected at the earliest opportunity. This action recognises that serious non-compliance could compromise the very management systems that the Quality Management System was designed to control.

4.3 Assurance

Within the operation of the Quality Management System, the businesses will ensure that:

- *Quality Audits* – are carried out by internal auditors. These audits will be subject to a planned schedule that will audit all the management systems against the requirements of the relevant standards. All audits will produce a detailed report identifying areas of non-compliance and specifying the corrective action required.
- *Quality Records* – are to be maintained throughout the Quality Management System operation as a basis for providing quality assurance to all associated with, responsible for/or dependent upon the business provided.

4.4 Quality Promotion

Within the operation of the Quality Management System, the Companies involved in the business or business activity will ensure that:

- *Training* – Appropriate training is provided to all those involved in the operation in support of the Quality Management System.
- *Lesson Dissemination* – Lessons arising from quality audits/assessments are disseminated widely within the organisation at management and operational levels.
- *Quality Improvement* – All staff are actively encouraged to propose solutions to improve both the Quality Management System and the quality of service delivery within the business.

5 Responsibility and Authority

This policy standard is issued under the authority of the Managing Director; Time to Market Ltd. Responsibility for implementation of this policy standard is set out below:

- Responsibility for the achievement of this Policy Statement rests with the Board.
- Managers are responsible for implementing the Policy Statement, monitoring its implementation in their everyday activities and reporting.
- All staff members are responsible for the ownership and undertaking of their quality management functions in accordance with this Policy Statement and for its implementation within the framework of Time to Market's procedures and directives.

7 Guidance and Standards

The following international standards provide useful guidance on the implementation of quality management:

- ISO 9000:2000 Quality Management Systems – Fundamentals and Vocabulary.
- ISO 9001:2000 Quality Management Systems – Requirements.
- ISO 9004:2000 Quality Management Systems – Guidelines for Performance Improvements.
